cf-wk03-ex1-10

1- Issues with deployment (GitHub Pages)

- Absolute vs relative path for some pages needed to be corrected.
- Using xml stylesheet tag inside SVG file to format SVG as an object instead og img or SVG tags (style sheet path requires exit from img folder "../" at the begining).

2- Issues with cross testing (BitBar)

- Grid dose not work on IE11 (will not be fixed, IE is used 0.71% in germany https://gs.statcounter.com/browser-market-share/desktop/germany/#monthly-202207-202207-bar)
- Navigation is not completly visible on mobile (**fixed**: flex-wrap).
- Some buttons changes look based on OS (**fixed**: Changed input to button).
- svg has overflow on mobile (**fixed**: max-width 90%).

3- IDE & linters

- VsCode + W3C Web Validator.

4- Screenshot of W3C Validator
